EXPERIENCE

Qualcomm, ML Intern

05/2024 – 07/2024

Bangalore, India

- Conducted in-depth research on **GPU programming** and optimizing GPUs for machine learning algorithms
- Developed CUDA code from scratch, demonstrating a strong understanding of the **CUDA framework** including the use of libraries like **cuFFT** and **cuBLAS**
- Acquired comprehensive expertise in **benchmarking** and **profiling AI PCs** through detailed performance analysis, identifying bottlenecks and areas for improvement

IEEE Computer Society, Chair

02/2023 – 02/2024

Bangalore, India

- **Led and organized** the student chapter of the IEEE Computer Society
- Spearheaded **Hack4Soc 2.0** 🔗, a **24-hour All-India Hackathon**, overseeing all aspects. With over **600 registrations**, solidified it as the flagship hack of RVCE 🔗

PROJECTS

TalkTube 🔗

- A browser plugin that **creates the most important sections** for a YouTube video along with the respective **timestamps**
- Prompts users to **ask any question** related to the video and provides an **accurate answer** based on the content in the video along with the **timestamp**
- Implemented **Retrieval Augmented Generation (RAG)** using **LlamaIndex, Vector Databases, LLMs**

IPL Score Predictor 🔗

- Built a **Ridge Regression** model from scratch based on the data from 2008-2017 IPL season
- The model takes in various parameters and predicts an innings score
- Used **Flask, Jupyter Notebook, HTML, CSS and Render** to host the webapp

NoteIT 🔗

- Developed the website with Flask to include **authentication, databases and CRUD operations**
- Users can create accounts with mail IDs and login with authenticated credentials to **create and delete** their notes
